

TNT ACTIVATOR

What is *TNT Activator*? *TNT Activator* is a unique blend of natural biostimulants, trace and ultratrace minerals, nutrients and energy sources that creates an explosion of beneficial soil microorganisms, stimulates root growth and the plant's natural immune system.

Why use *TNT Activator*? Getting your seedlings off to a good start is critical to future success in the growing sea-son. It is like colostrum for a baby plant and its supporting microbial community in the root zone. Using *TNT Activator* can improve your plants' resiliency to adverse environmental conditions like drought and help build soil organic matter.

Can I use *TNT Activator* in organic production? All of the ingredient in *TNT Activator* are approved for organic use in the US and Canada. Check with your certifier before using any products in organic production.

When should I use *TNT Activator*? *TNT Activator* can be used at planting, prior to planting or throughout the growing season.

How should I use *TNT Activator*? *TNT Activator* can be used: on the soil to stimulate the growth of beneficial soil microbes; in-trench as a starter; during the grow-ing season as a side-dress to stimulate and support the soil microbes. Foliar application could stain fruit/foilage so it should be applied to the soil. Adequate dilution is important. See the label for more details.

Application rates

Broadacre crops: 2.5 gal (10 L)/acre; 1:2+ dilution at planting

Transplants/root dip: 1:100 dilution

Potted plants: 1:100 dilution every 2 weeks

Fertigation: 1:1000 dilution every watering

TNT Activator is not intended to be the sole input and should be part of a systems approach. Always do a jar test for compatibility when mixing this product with any other inputs.

TNT Activator is a product of
