(574) 532-6201

Product description:

TNT-Super Salmon + is a fortified salmon hydrolysate containing chitin, kelp, amino acids, volatile fatty acids and natural fermentation organisms. It provides both short term and mid term nutrition for your crop while promoting a flush of beneficial microbes for continued support of your plants. The King of fish hydrolysates, it is rich in soluble fats and the building blocks for proteins and complex phytochemicals that can help reduce insect and disease pressure in plants.

DIRECTIONS for USE:

Product must be diluted. Minimum dilution rates are for product: water. Mix thoroughly before use (do not use air). Not likely compatible with calcium inputs. Depending on soil or tissue tests, additional nutrients may be added as indicated. Always jar test mixtures prior to filling equipment. Once diluted, this product is highly biologically active; therefore, do not leave diluted product in equipment and clear/flush lines if it will stand for more than 4 hours. While this product has been filtered for ease of use, it is advised to filter it to the specifications of the equipment being used to avoid potential plugging of equipment.

Application Rates:

In trench/broadcast: up to 2 gal/acre (min 1:3 dilution)

Foliar/fertigation: up to 2 gal/acre (min1:10 dilution)

STORAGE:

Prevent product from freezing. SuperSalmon+ continues to produce a small amount of waste gas from the fermentation at temperatures above 40 degrees F. Vent the container during storage to avoid possible bursting of the container. Store SuperSalmon+ in a cool place and out of direct sunlight.

CAUTION:

Keep out of reach of children and pets. Do not inhale or ingest. Avoid contact with skin, eyes, & clothes. If contact is made, flush eyes with water, clean skin, or wash clothes. Consult a doctor if swallowed. Wear protective gloves and wash hands thoroughly after handling. Do not eat, drink, or smoke when using this product. Handle in a well ventilated area. Do not feed to livestock.

NOTICE:

Seller warrants that product conforms to its chemical description and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions of use. Since weather, crop, and soil conditions vary, (TNT Farming Solutions) seller makes no warranty of any kind, expressed or implied, concerning the use of this product. User assumes all risks of use and handling, whether or not following directions or suggestions.
