

# TNT Hi-ENERGY HAY

HEH is a product of TNT Farming Solutions, LLC.

6928 S Benham Rd, Versailles, IN 47042  
rdstephens324@gmail.com

(574) 532-6201

## Product description:

Hi-Energy Hay (HEH) is a proprietary blend of Hi-Energy Fish and other naturally sourced biostimulants and minerals intended to give your forages and pastures the energy boost of Hi-Energy Fish while providing a full suite of trace and ultra-trace minerals to support healthy growth and photosynthesis. It is GMO-free and made of organically approved ingredients, suitable for Organic and non- Organic cultural practices.

## DIRECTIONS for USE:

HEH is best suited as a post-cut or post-grazing foliar application to hay, forages and pastures. It is recommended to apply the product two weeks or more (more is better) prior to cutting/grazing in order to maximize the response/growth. Compatibility with other fertilizers or other spray materials should always be checked using a jar test. The suggested foliar rate is 1 gallon/acre in a minimum of 10 gallons of water/acre

Do NOT exceed 4 quarts/acre in 10 gallons of water per acre in foliar applications to avoid possible phytotoxicity. Use twinjet flat fan tips equipped with strainers sized according to the tip delivery rate.

## STORAGE:

Freezing generally does not damage or alter the performance of the product. HEH may continue to produce a small amount of wastegas from the fermentation at temperatures above 40 degrees F. Vent the container during storage to avoid possible bursting of the container. Store HEH in a cool place and out of direct sunlight.

## CAUTION:

Keep out of reach of children and pets. Do not inhale or ingest. Avoid contact with skin, eyes, & clothes. If contact is made, flush eyes with water, clean skin, or wash clothes. Consult a doctor if swallowed. Wear protective gloves and wash hands thoroughly after handling. Do not eat, drink, or smoke when using this product. Handle in well ventilated area.

## NOTICE:

Seller warrants that product conforms to its chemical description and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions of use. Since weather, crop and soil conditions vary, TNT Farming Solutions and the seller make no warranty of any kind, expressed or implied, concerning the use of this product. User assumes all risks of use and handling, whether or not following directions or suggestions.
