TNT Activator is a unique blend of our TNT High Energy Fish only premium ingredients. TNT Activator provides your seedlings or young plants with the kick they need to get them off to a good start with better and faster germination, improved vigor, and root growth. TNT Activator is made of ingredients approved for organic use. This produce is suitable for organic or conventional systems and can be used in the early stages of all the cropping systems, including turf and greenhouse applications.

Guaranteed Analysis:

Total Nitrogen (N).....1%
Available Phosphate (P₂O₅).....1%
Soluble Potash (K₂O)..... 1%

DIRECTIONS for USE:

Some settling may occur after extended periods of storage. Always mix/stir thoroughly before use. The produce has been filtered at the time of manufacture; however, separate filtration for critical systems should be used to avoid plugging of very small orifices. Do not store diluted produce in equipment - use all that you mix within 8 hours.

Application Rates:

Broadacre Crops: 10 L (2.5 usg) per acre in trench (min. dilution 1:2, 1:4+ preferred at planting).

Transplants/fertigation: Dilute 1:100 for soil drench water or bi-weekly fertigation of starter plants (use within 8 hrs).

Continuous fertigation: Dilute 1:1000 (use within 8 hrs).

Foliar/fertigation: up to 2 gal/acre (min1:10 dilution)

STORAGE:

Store out of direct sunlight. Freezing will not damage the product but will amplify the separation of components and settling, resulting in additional effort to thoroughly blend the produce again before use. Cold product is thicker and more difficult to mix/transfer. Keep containers closed when not in use.

CAUTION:

Keep out of reach of children and pets. Do not inhale or ingest. Avoid contact with skin, eyes, & clothes. If contact is made, flush eyes with water, clean skin, or wash clothes. Consult a doctor if swallowed. Wear protective gloves and wash hands thoroughly after handling. Do not eat, drink, or smoke when using this product. Handle in a well ventilated area.

NOTICE:

Seller warrants that product conforms to its chemical description and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions of use. Since weather, crop, and soil conditions vary, (TNT Farming Solutions) seller makes no warranty of any kind, expressed or implied, concerning the use of this product. User assumes all risks of use and handling, whether or not following directions or suggestions.
